Achieving Statewide Impact with Regional Flexibility:

- Recommendation that each region allocate 80% of funding to 6 prioritized areas
- If no regional need exists, or, if lack of capacity prevents implementing services in these strategy areas, regional funding plans will include this rationale for funding below 80%
- If funding is below 80% for other reasons, regional plan will include rationale; if there are public system partners who hold primary responsibility in a different strategy area that region seeks to fund, the plans should explain how those partners will be engaged
- In recognition of FTF commitment to equity and prioritization of under-resourced and underserved children and families, regional funding plans shall include a description of how the plan promotes equity and support of these children and families
